

THESE BOOTS WERE MADE FOR CRAMPONS

A REVIEW OF THE HANWAG DEIMOS GTX

We have used the Hanwag Deimos GTX for Cuillin mountaineering and on technical mixed and ice routes up to grade VI in Skye, Ben Nevis and Glencoe. It's proved a great all round boot dealing with all the different challenges presented in these areas. It is lightweight and this gives you a chance to be precise with your footwork while climbing and mountaineering, the extremely rigid sole also gives a lot of confidence when standing on a front point too. The lightness of the boot and touches such as the neoprene cuff make for great walking comfort and for keeping snow and draughts out. We have used this boot with the petzl lynx crampon and it fits very well indeed very well. Finally the boot looks as neat as it feels and the dark red makes for some great contrasts against the black and white colours of winter!
